PROFILE

An experienced MERN stack Developer with 2.5+ years of specialized expertise in designing, developing, and maintaining high-quality applications. Proficient in MongoDB, Express.js, React.js, and Node.js, with a strong grasp of RESTful API development, performance optimization, and user-centric UI design. Adept at working in cross-functional teams, debugging complex issues, and adhering to best practices in clean, maintainable code development. Optimized front-end rendering and API latency, improving load times and user experience on both desktop and mobile platforms.

SKILL

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Redux, Next.js, Tailwind CSS, Material UI, Responsive Design

Backend: Node.js, Express.js, REST API Development, JWT Authentication

Databases: MongoDB, MySQL, Firebase

DevOps & Tools: Docker, Redis, Git, GitHub, Postman, Webpack, Babel, ESLint, npm, VS Code

Core Concepts: Data Structures & Algorithms, DOM Manipulation, Asynchronous Programming, Performance Optimization

Methodologies: Agile, Code Reviews, Component-Based Architecture

PROFESSIONAL EXPERIENCE

Technomers, Junior Software Developer

Jun 2023 – Present | Mangalore

- **Developed and maintained** web applications using the MERN stack.
- **Developed responsive React.js components** with code-splitting, lazy loading, and memoization, reducing page load time from 4.2s to 2.9s
- **Integrated REST APIs with robust error handling** and implemented Redux state management across multiple application modules
- **Designed and implemented** RESTful APIs using Node.js and Express.js
- **Built Node.js/Express APIs** for backend logic and data handling, contributing to full-stack feature development.
- **Built enterprise dashboards** using Material UI and Tailwind CSS, creating a reusable component library that accelerated feature development
- **Enhanced user engagement** by identifying and resolving critical UI/UX issues through user feedback analysis and A/B testing
- **Optimized React performance** using React.memo, useCallback, debouncing and useMemo to eliminate unnecessary re-renders
- **Collaborated with backend and QA teams** to debug API integration issues, significantly improving reliability
- **Implemented mobile-first responsive layouts** using CSS Grid and Flexbox with strong cross-device compatibility
- **Integrated MongoDB** with web applications to efficiently store, retrieve, and manage data
- **Created containerized front-end builds** using Docker for consistent deployments.

PROJECTS

DevTinder

Tech stack: Node.js, Express.js, MongoDB, React.js, JWT

- Built a full-stack developer networking platform with authentication and CRUD operations for user profiles.
- Created RESTful APIs to send, accept, or reject connection requests.
- Handled interaction states such as interested, ignored, accepted, and rejected.

Netflix GPT

Tech stack: React.js, OpenAI API, Redux, Tailwind CSS

- Developed a Netflix-inspired video browsing interface enhanced with GPT-based content recommendations.
- Used OpenAI's API to generate personalized content suggestions, improving the user experience.
- Styled the application using Tailwind CSS and managed state efficiently with Redux.

ComplIT Website

Tech Stack: React, Tailwind CSS, Material UI

- Designed and developed a dynamic and responsive front-end web application.
- Implemented Tailwind CSS for a modern and consistent UI/UX.
- Enhanced user interactions using Material UI components.
- Worked closely with the team to gather requirements and conducted extensive testing.

HirePanda

Tech Stack: React, Tailwind CSS, Git

- Built a responsive job search platform with React.js.
- Integrated API responses into frontend components.
- Implemented dynamic UI components with Tailwind CSS for an optimized design.
- Integrated version control using Git to manage and track project progress.

Treeopedia

Tech stack: Node.js, Express.js, MongoDB, React.js

- Built and consumed RESTful APIs for seamless data communication between frontend and backend
- Implemented CRUD operations for managing tree/plant data with MongoDB, ensuring efficient data storage and retrieval
- Designed responsive UI components using modern CSS/Tailwind for better user experience across devices

EDUCATION

Alva's Institute of Engineering and Technology,

2019 – 2023 | Moodbidri

Bachelor of Engineering in Information Science - CGPA: 8.3/10

SVS P U College,

2017 – 2019 | Bantwal

Pre-University College (12th Grade) - 78%

CERTIFICATES

Problem Solving through Programming in C – NPTEL Online Certification

ReactJS Fundamentals – Infosys Springboard

Full stack Web Development - Udemy
